Satin Tone on Tone Mixing & Processing

Hair Type	Mix Colour & Developer	Processing Time
Normal - Standard Colouring	1 + 2	20 Mintues
Coarse Hair/Grey Coverage	1 + 2	30 Mintues
Porous/damaged hair – after chemical treatment	1 + 2	Up to 15 Minutes
Toning	1 + 2	Visual Processing Up to 10 Minutes

Infiniti Satin blends up to 70% grey hair, for greater coverage results use the Naturals alone. When a fashion shade is desired add 25% Natural to the colour mix. i.e. 15g 6.45 + 5 g 6.0 + 40g Satin Activating Crème.

Intense Reds - Mix 1 Part Colour + 1 Part Developer

Natural Level of Hair	Suggested Developer Selection	Suitability
8	6%	Magenta Only
7	6% or 9%	Magenta Only
6	3%	All Shades (except Magenta)
5	3% or 6%	All Shades (except Magenta)
4	6% or 9%	All Shades (except Magenta)
3	9% or 12%	All Shades (except Magenta)
2	9% or 12%	All Shades (except Magenta)
1	Not recommended	Not Recommended

Processing Time: 30 minutes no heat or 15 minutes gentle heat

Ideal results achieved on natural hair, when coloured hair is present the result will be less intense/bright.

Colour Removal & After Care

At the completion of colour processing, emulsify colour paying particular attention to hairline areas. Rinse until water runs clear, lightly shampoo with White Ice Treatment Shampoo and follow with White Ice Treatment Conditioner.

It is recommended that a skin sensitivity test be completed 24-48 hours prior to the application or use of Affinage Professional products
